

# DEMOLITION PERMIT SUBMITTAL REQUIREMENTS

## City of Healdsburg

401 Grove Street Healdsburg, CA 95448

Phone: 707.431.3346

Fax: 707.431.2710

Email: [building@healdsburg.gov](mailto:building@healdsburg.gov)

Website: [www.healdsburg.gov](http://www.healdsburg.gov)

If you have any question or want to learn more about how your Building Division can serve you, please call 431-3346 or come by and visit us at the Healdsburg Community Development Center, 401 Grove Street, Monday - Thursday between 7:30 a.m. and 5:30 p.m. Alternate Fridays between 8:00 a.m. and 5:00 p.m.

## **TOTAL BUILDING DEMOLITION**

This requires a building permit, permit fee and five (5) sets of plans containing the following information:

- Site Plan** – Submit a fully-dimensioned site plan drawn to scale to include:
  - a. North direction arrow and scale.
  - b. Location, size and use of all structures on the lot.
  - c. Property lines and lot dimensions.
  - d. Structures to be demolished on the lot.
  - e. Dimensions and square footages of structures to be demolished.
  - f. Street address, Assessor's Parcel Number, owner's name and mailing address.
  - g. Location, trunk size, species and outline of the dripline of all trees on the site or adjoining sites with a dripline projecting into the proposed site. **(A separate Tree Removal Permit may be required.)**
  - h. Location of all above- and below-ground utilities, including meters, utility boxes, sewer, water, electricity and natural gas.
  - i. Location of any underground tanks. **(Underground fuel tanks require a separate Closure Permit from the Fire Department prior to removal of tanks.)**
  - j. Existing driveway of approaches, parking areas and the number of parking spaces. **(Permits for the removal of covered parking may be withheld until a replacement structure is permitted.)**
- Stormwater and Erosion Control Plan** – If demolition will result in bare earth, include a storm water drainage and erosion control plan.
- Tree Protection Plan** – If trees are located on the site, include tree protection measures.
- Air Pollution Control District Clearance** – See attached FAQ's.
- Permit to Abate Lead Paint Hazard** – See attached application and evaluation report if required.
- Construction Waste Management Plan** – See attached application.
- Historic/Cultural Significance Clearance** – Structures at least 50 years and older shall be reviewed by the Planning and Building Department for their potential historic architecture or cultural significance. Structures determined to be potentially significant may be required to provide a Historic Resource Report and Evaluation prepared by a qualified professional prior to authorizing the building permit. **(A demolition permit may be withheld until a replacement structure is approved.)**

## **INTERIOR / PARTIAL DEMOLITION**

This permit is not issued for residential projects. Commercial projects require a building permit, permit fee and five (5) sets of plans containing the following information:

- Site Plan** – Provide an existing and post demolition site plan drawn to scale showing the perimeter of existing or portions of structures on the site to remain and existing and portions of existing structures on the site to be demolished.
- Floor Plan** – Provide an existing and post demolition floor plan drawn to scale. Clearly identify all walls and other items to be demolished and all walls to remain.
- Air Pollution Control District Clearance** – See attached FAQ's.
- Permit to Abate Lead Paint Hazard** – See attached application and evaluation report if required.
- Construction Waste Management Plan** – See attached application.
- Historic/Cultural Significance Clearance** – Structures at least 50 years and older shall be reviewed by the Planning and Building Department for their potential historic architecture or cultural significance. Structures determined to be potentially significant may be required to provide a Historic Resource Report & Evaluation prepared by a qualified professional prior to authorizing the building permit. **(A demolition permit may be withheld until a replacement structure is approved.)**

## Asbestos FAQ

January 2023

**Please Note:** Sonoma County has two Air Districts: the Northern Sonoma County Air Pollution Control District and the Bay Area Air Quality Management District. Both Districts implement the federal asbestos rules (NESHAP), but the Bay Area has additional, regulatory requirements of its own. The Bay Area uses a "J" number to approve asbestos notification; the Northern Sonoma does not. You must provide the required notification to the Air District where your project resides. Verify what Air District you belong to at [www.nosocoair.org](http://www.nosocoair.org)

### What is the purpose of the Asbestos NESHAP regulation?

The purpose is to protect the public health by minimizing the release of asbestos when facilities which contain asbestos-containing materials (ACMs) are demolished or renovated.

### Are single-family private residences regulated by the Asbestos NESHAP?

No.

### Are mobile homes or mobile structures regulated by the Asbestos NESHAP?

Mobile homes used as single-family dwellings are not subject to Asbestos NESHAP. Mobile structures used for non-residential purposes are subject to NESHAP.

### What is a "facility?"

As defined in the regulation, a "facility" is any institutional, commercial, public, industrial or residential structure, installation or building (including any structure, installation or building containing condominiums, or individual dwelling units operated as a residential cooperative, **but excluding residential buildings having four or fewer dwelling units**); any ship; or any active or inactive waste disposal site. Any building, structure or installation that contains a loft used as a dwelling is not considered residential. Any structure, installation, or building that was previously subject to the Asbestos NESHAP is not excluded, regardless of its current use or function.

### If I renovate several two-family units, are the units defined as a "facility?"

Residential buildings which have four or fewer dwelling units are not considered "facilities" unless they are part of a larger installation (for example, an army base, company housing, apartment or housing complex, part of a group of houses subject to condemnation for a highway right-of-way, an apartment which is an integral part of a commercial facility, etc.).

What is the difference between demolishing a facility and renovating it?

"Demolition" and "renovation" are defined in the regulation. You "demolish" a facility when you remove or wreck any load-supporting structural member of that facility or perform any related operations; you also "demolish" a facility when you burn it. You "renovate" a facility when you alter any part of that facility in any other manner. Renovation includes stripping or removing asbestos from the facility.

How much asbestos must be present before the Asbestos NESHAP work practice standards apply to renovation projects?

Asbestos NESHAP regulations must be followed for all renovations of facilities with at least 80 linear meters (260 linear feet) of regulated asbestos-containing materials (RACM) on pipes, or 15 square meters (160 square feet) of regulated asbestos-containing materials on other facility components, or at least one cubic meter (35 cubic feet) of regulated asbestos-containing materials on other facility components where the amount of RACM previously removed from pipes and other facility components could not be measured before stripping. These amounts are known as the "threshold" amounts.

How much asbestos must be present before the Asbestos NESHAP work practice standards apply to demolition projects?

Asbestos NESHAP regulations must be followed for demolitions of facilities with at least 80 linear meters (260 linear feet) of regulated asbestos-containing materials (RACM) on pipes, 15 square meters (160 square feet) of regulated asbestos-containing materials on other facility components, or at least one cubic meter (35 cubic feet) of regulated asbestos-containing materials on other facility components where the amount of RACM previously removed from pipes and other facility components could not be measured before stripping. However, all demolitions must notify the appropriate regulatory agency, even if no asbestos is present at the site, and all demolitions and renovations are "subject" to the Asbestos NESHAP insofar as owners and operators must determine if and how much asbestos is present at the site.

Who is responsible for submitting a notification -- the owner of the building which is being demolished or renovated, or the contractor?

The NESHAP regulation states that either the owner of the building or operator of the demolition or renovation operation can submit the notification. Usually, the two parties decide together who will notify. If neither provide adequate notice, EPA can hold either or both parties liable.

When a condominium complex is being renovated, who as owner, is responsible for submitting a notification?

While owners and operators share responsibility for proper notification, the condominium or co-op board is responsible as the owner. The board should ensure that they are told when work takes place on individual units, so that they can comply with notification (and other EPA) requirements, especially if multiple operators are involved.

Do demolitions of facilities in which no asbestos is present require notification?

Yes. All demolitions that meet the definition of facility must notify.

### Construction Waste Management Plan (CWMP)

Project Address: \_\_\_\_\_ Building Permit #: \_\_\_\_\_

Project Name (if applicable): \_\_\_\_\_

Project Description: \_\_\_\_\_

Contractors Name: \_\_\_\_\_ Lic# \_\_\_\_\_ Telephone: \_\_\_\_\_

Email: \_\_\_\_\_

This construction waste management plan is hereby submitted to comply with Section 4.408.1 (residential) or 5.408.1 (nonresidential - is required whenever a permit is required for work) of the 2022 California Green Building Standards Code. The purpose of this plan is to identify and outline the methods to be used as the minimum requirements for a construction waste management plan.

The method of waste tracking to be used on this project will be: (Check one box)

**Easy Method (see page EZ-2)**

OR:

**Advanced Method (see page EZ-2)**

**NOTE:** If you checked advanced method you must complete a CWMP worksheet in order to track your projects recycling and/or reuse (diversion) measures.

The facility (or facilities) where the construction waste material will be taken is:

Name of Facility: \_\_\_\_\_

County: \_\_\_\_\_

Every effort shall be made to use recycling and/or reuse (diversion) measures to reduce the amount of construction waste and other materials sent to landfills. Whenever possible, site-sorted debris boxes shall be used to segregate construction waste materials to maximize the diversion rate. Waste reduction and recycling strategies shall be discussed at periodic project meetings. Each new contractor that comes onto the site shall be provided with a copy of the CWMP, which shall also be posted in the project office. The project manager shall also instruct all subcontractors as to the location and proper use of debris boxes for disposal of construction waste materials. In the event that a subcontractor provides their own debris box or off haul, the project manager shall be responsible for providing verifiable documentation which demonstrates compliance with the waste management requirements of the California Green Building Code.

**Upon completion of the project the Contractor shall** provide verifiable documentation which demonstrates compliance with the waste management requirements of the California Green Building Code is provided to the Healdsburg Building Division.

# Pre-Construction and Demolition Recycling Plan

**Recycling Construction and Demolition (C&D) Materials is REQUIRED.**

Project Name: \_\_\_\_\_

Project Location: \_\_\_\_\_

Building Permit #: \_\_\_\_\_

Project Sq. Ft: \_\_\_\_\_

Owner Name: \_\_\_\_\_

Contractor Name: \_\_\_\_\_

Telephone: \_\_\_\_\_

Email Address: \_\_\_\_\_

<b>EASY METHOD</b>	<b>STEP 1</b>	<b>STEP 2</b>	<b>STEP 3</b>
	<p>Project owners, contractors or other permit applicants must <u>complete this form and sign on the next page</u>. Turn in pages <b>EZ-1&amp;2</b> prior to construction.</p>	<p>Self-haul or have your debris box hauler deliver C&amp;D materials to a <u>Certified Facility</u> for recycling.</p>	<p>Collect receipts from Certified Facilities for all loads and staple them to the "Post Construction Recycling Documentation" form (<b>EZ-3</b>). Turn in completed <b>EZ-3</b> along with Certified Facility receipts <u>prior to final inspection</u>.</p>

<b>ADVANCED METHOD</b>	<b>STEP 1</b>	<b>STEP 2</b>	<b>STEP 3</b>
	<p>Project owners, contractors or other permit applicants must <u>review CALGreen code Title 24</u> and understand the requirements of Section 4.408, 5.408, 301.1.1 and 301.3. Turn in pages <b>EZ-1&amp;2</b> prior to construction.</p>	<p>Develop a <u>Construction Waste Management Plan (CWMP)</u> using the Advanced Method form template (<b>AD-1&amp;2</b>).</p>	<p>Implement your CWMP. Using pages <b>AD-3&amp;4</b> from the Advanced Method form, provide complete documentation of recycling <u>prior to final inspection</u>. Turn in pages <b>AD-1-4</b> prior to final inspection.</p>

I certify under penalty of perjury that I will recycle C&D materials from my project via (check one):

- THE EASY METHOD:** Direct C&D materials to a Certified Facility and submit weight tickets with pages **EZ-3&4** prior to final inspection showing material is recycled from Certified Facilities.
- Reuse and/or deconstruct first.
  - Direct all C&D materials to a Certified C&D Facility or building materials reuse business. A list is available online: [ZeroWasteMarin.org/CD](http://ZeroWasteMarin.org/CD)
  - Save documentation of recycling (C&D Facility receipts) and submit prior to final inspection.

- THE ADVANCED METHOD:** Ensure and prove recycling of C&D materials via your CWMP. Requires submission of detailed information per CALGreen code, careful tracking of all materials generated by your project, and submission of documentation of recycling prior to final inspection. Use the “Advanced Method” form template.

*I certify that I have read the Advanced Method form template and that I will abide by its requirements and the requirements of CALGreen code. I will turn in **pages EZ-1&2** prior to construction and **AD-1-4** prior to final inspection.*

- I will use the Advanced Method form template as required and described under CALGreen code Title 24. The template is available at your building counter or at: [ZeroWasteMarin.org/CD](http://ZeroWasteMarin.org/CD).
- I hereby certify (through selecting “Advanced Method” and signing below) that this project will adhere to the requirements stated on **AD-1&2**.
- Construction material generated by this project will be: (check appropriate box)
  - Sorted on-site    Deconstructed and/or reused
  - Below the CALGreen threshold of disposal per square foot

DIRECTIONS: OFF HWY 116, 1/2 MILE FROM  
SONOMA

### COVER YOUR LOAD. IT'S THE LAW.

LOCAL AND STATE LAWS REQUIRE THAT GARBAGE  
AND DEBRIS BEING TRANSPORTED BY VEHICLE BE  
COVERED OR SECURED IN A WAY TO PREVENT  
DROPPING OR SPILLING ONTO ROADWAYS.  
UNCOVERED/UNSECURED LOADS WILL BE CHARGED  
\$15.00 PER VEHICLE AT COUNTY REFUSE DISPOSAL  
SITES.

## OTHER DROP-OFF

### REPUBLIC SERVICES/GLOBAL MATERIALS RECOVERY SERVICES

3899 SANTA ROSA AVE, SANTA ROSA  
M-SA 7A-5P, SU 8A-4P 585-0511

Global Materials Recovery Services is not part of  
County Refuse Disposal Site system and cannot  
accept refuse/garbage. Fees differ at this location.

## FEE SCHEDULE FOR DISPOSAL SITES EFFECTIVE APRIL 1, 2022

USE OF DISPOSAL SITES IS LIMITED TO WASTE GENERATED BY RESIDENTS AND BUSINESSES IN SONOMA  
COUNTY. PAYMENT BY CASH, DEBIT, AND CREDIT CARD ONLY. NO CHECKS.

Disposal sites will be closed on Sundays and on the following dates: New Year's Day • 4th of July  
• Labor Day • Thanksgiving Day • Christmas Day

FEES MAY CHANGE WITHOUT NOTICE

	<b>REFUSE/GARBAGE</b> ALL VEHICLES ARE WEIGHED	<b>\$135.00/TON</b> MINIMUM \$33.00 FEE PER VEHICLE
	<b>YARD DEBRIS</b> ALL VEHICLES ARE WEIGHED LEAVES • GRASS • TREE PRUNINGS • FRUIT • VEGETABLES • BREAD • COFFEE FILTERS • DAIRY • EGGSHELLS • PASTA • RICE <b>NOT ACCEPTED</b> Animal/pet waste • Bamboo • BBQ ashes (wood fireplace ashes okay) • Cactus • Cooking oil and liquid waste • Dirt, rocks, or sod • Glass • Manure • Palm fronds • Pampas grass • Plas- tics including those labeled biodegradable or compostable • Poison oak • Sudden Oak Death infested material • Tree stumps over 18" in diameter or more than 4 feet in length	<b>\$98.50/TON</b> MINIMUM \$33.00 FEE PER VEHICLE

# WINDSOR MATERIAL RECOVERY FACILITY

A division of M & M Services, Inc.

February 6<sup>th</sup> 2019

RE: WINDSOR MATERIAL RECOVERY FACILITY RECYCLING CERTIFICATION "WMRF"

To Whom It May Concern:

The Windsor Material Recovery Facility, aka WMRF, (M&M Services, Inc.) facility SWIS # 49-AA-0398 is a permitted Medium Volume CDI Facility located in Windsor California that accepts mixed construction and demolition loads, as well as many other types of inert (clean recycling loads) material. All incoming loads are sorted and processed to remove recyclable material.

WMRF makes available monthly and quarterly reports to the Sonoma County Local Enforcement Agency, Sonoma County Waste Management Agency and many other governing jurisdictions for their state reporting requirements. The following data is the details for the diversion percentages.

- January 2019
  - 2,913.77 tons were received by WMRF.
  - 1,851.77 tons were removed from the waste stream and recycled.
  - 958.77 tons were landfilled.

This equates to a recycling rate of **65.9%** for the month of January 2019.

Questions concerning this letter may be directed to Dustin Abbott at 1-877-698-8473

Sincerely,

*D Abbott*

**Dustin Abbott**

CFO / Vice President

Windsor Material Recovery Facility

A Division of M&M Services, Inc.

590 Caletti Ave

Windsor CA 95492
