Public Maps: FAIR MAPS Act Assessment

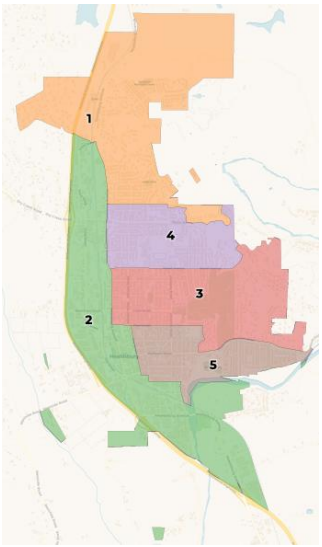
The following maps were submitted by March 31, 2025 and can be considered during the April 7 public hearing

Under the FAIR MAPS Act, the City of Healdsburg is required to follow a ranked list of criteria in their districting process:

- Relatively equal in population size – total deviation is under 10%
- Contiguous
- Maintains "communities of interest"
- Easily identifiable and understandable lines, following city, natural, and man-made boundaries
- Compact

As demographers, we can assess all criteria objectively except for "maintaining communities of interest." This particular criterion is subjective by definition and should be discussed by the public and the City Council to determine how well these maps fulfil this criterion.

ID 290505
"Update Map A"
Total Deviation: 8.5 %
Date of submission: 3/19/2025



Relatively equal in population size?	✓
Contiguous?	✓*
Lines are easy to understand and identify?	✓
Compact?	✓

*There are some noncontiguous edge pieces that need to be cleaned up.
